

Supplementary text 2: Rural research placements study coding framework

Main codes:

- Student background
 - Description of program or discipline from which research placement students are originating from
- Motivations
 - Motivating factors that made individuals/team/health service more likely to host student researchers
- Facilitators
 - Factors which facilitated the individual/team/health service in hosting student researchers
- Barriers
 - Factors which impeded the individual/team/health service in hosting student researchers
- Resources
 - Human, material, or other resources which were accessed/allocated to support student researchers
- Systems
 - Formal or informal systems established around hosting student researchers
- Benefits
 - Benefits of hosting student researchers as perceived by the individual/team/health service
- Burdens
 - Burdens of hosting student researchers as perceived by the individual/team/health service
- Project examples
 - Description of research projects with student involvement (or student-led)
